

It is a simple project done using HTML , CSS And Javascript.

It is a chrome extension which will track the websites you visit.

- 1) First deploy the extension to chrome.
- 2) Three buttons are seen. Save tab, save input and delete all.
- 3) Save tab is for saving the url.
- 4) Save input is for saving the text in the input field.
- 5) Delete all is for deleting the saved inputs.
